Descripción del producto

24 hour programmer with power socket. Model MZ 20-1. This daily timer allows thanks to its wheels to program in intervals of 15 minutes the use of its socket, perfect to save energy and use in multiple situations; for example for lights (programming it to light up at certain hours of the afternoon or evening) to heat a room early in the morning during the winter and save you getting out of bed to turn on the heater, to turn on the water pump of your aquarium etc. Elegant and simple design in black with white hour wheel. With IP20 protection, it includes a manual for its correct use and programming. It is recommended for indoor use. On the back there is a plug to connect to the mains and on the side there is a practical on/off button. Its maximum power is between 220 and 240 V. 50 Hz and 16A.
