- Numero de tomas: 4
- Tipo de interruptor: General
- Toma de tierra: Sí

## Descripción del producto

Cable reel with anti-shock protection for the garden. Its white drum has an ergonomic handle to make it easy to move, made of resistant anti-shock material. It has 4 female schuko outlets in the central area, black in colour. And a T.T., the plug has a cable with a length of 50 metres. It also has thermal protection, which means that when the device overheats it interrupts the power supply. The red button also does the same function when pressed, depriving all plugged-in appliances of power. So it is very safe, made of resistant polycarbonate. It has an IP protection rating, which makes it perfect for outdoor use. Practical, discreet and small in size. It measures 28.5 cm high, 22.8 cm long, has a black handle for easy and quick cable collection, 230V power supply.
