

8M MICROWAVE CEILING MOTION DETECTOR

Prendeluz S.L.

Precio: **18,95€**

Detects at a distance of 2 to 8 metres

Otras características

- Alimentación: 200 - 240 V
- Color: Blanco
- Color de luz: Verde
- Distancia: 2 a 8 metros
- Ip: 20
- Medidas: 96 x 43 mm

Descripción del producto

Microwave motion detector. This simple and discreet detector uses the most advanced passive technology to detect presence using 5.8 GHz microwave waves. It detects movement at a distance of 2 to 8 metres (adjustable), at a detection angle of 360° degrees. Installation at a height of 1.5 to 3.5 metres is recommended. Ideal for monitoring entrances to offices, garages, corridors, meeting rooms, etc. Easy to install with 3 wires, it can be used with LED, filament and fluorescent bulbs: LED, filament, fluorescent, low-consumption and halogen bulbs (installation elements included). It has a round shape, in white, and measures 96 x 43 mm in diameter. A green LED light indicates that it is in operation, its cover, which hides the regulating buttons, is easy to use. The power input is 200-240Vac ~ 50Hz. and its power depends on the maximum load of the luminaires; with LED 300W and incandescent 1200W. It adjusts automatically to the light sensitivity and switch-on time, but it can also be easily adjusted using the buttons on the side; changing the operating time (from 10 seconds to 12 minutes) and the sensitivity to ambient light (from 3 to 2000 LUX). Recommended for indoor use, its protection index is IP20. Its operating temperature must be between -10° to 40°C, for an effective use.
