Descripción del producto

White metal and glass mirror with touch switch to turn it on and off. It uses LED bulbs for its lighting and reaches a temperature of 3000 K so it emits an ideal illumination as it is a mirror designed to be installed in the bathroom. Make the most of it in moments of low light or when necessary. By simply switching on the integrated LED lights you will notice a big difference and you will be able to see everything in detail through the mirror. Calculate the space where you want to install it with the measurement of 600.
