Descripción del producto

Flexo for wall Led . This black lamp has no cable, it is connected directly to the current (requires electrical installation). Its simple, modern design makes it perfect to place in the bedroom next to your bedside table, in a place of study, on your desk... Its 41 cm adjustable lamp allows you to have light wherever you need it. Its integrated LED emits a warm light thanks to its 3000 K temperature and its luminous intensity of 410 Lm. It is a long-lasting light, as the LED has a useful life of more than 20,000 hours. It is also low consumption, with a power of 5W. The base has a round shape, with the button for switching it on.
