Descripción del producto

Compact technical spotlight perfect for light rails or three-phase track mounting. It is compatible with any type of GU10 bulb (not included) so you can change the wattage, colour temperature and angle of aperture without having to change the whole spotlight. The joint adjusts to direct the light to the most desired spot, which makes it very practical. It measures 121 mm in length, 56.5 mm in width and 172 mm in height. This type of luminaire has become very popular for accent lighting or as a main light, not only in businesses such as restaurants, shops and hotels, but also in homes. As they are a flexible and practical option thanks to the freedom of configuration of the spotlights on the rails. The housing is made of aluminium and is black in colour.
