Descripción del producto

USB cable model 3.0 with transfer speed 4.8 Gbps (600 mb/s) is ten times higher than USB 2.0 by having 5 additional contacts. This cable is known for its super high speed. To differentiate it from previous USBs, the plastic inside the contacts has been identified with blue instead of black. Connector type USB-A male and USB-B female, this is the most advanced type A connector. The length of the cable is 1.8 metres, blue in PVC material. Perfect for extending your connections, for pc, keyboard, printer, etc.?
