Otras características

- Color: Gris
- Con infrarrojos: Sí
- Medidas: 135 × 70 × 56 mm
- Pilas: LR06 AA

Descripción del producto

PIR visitor annunciator, ideal for shops, offices and control of exterior and interior doors. This annunciator works with a power supply of 4 batteries 1'5V R-6 (AA) or with a 220 VAC - 6 VDC - 500 mA mains adapter (not included). Its switch has three positions for sound control (ding dong type), it can also be used as an alarm. It will detect movement (thanks to its infrared PIR sensor) at a distance of 5 metres. With an elongated rectangular shape, it measures 135 ? 70 ? 56 mm and is made in grey cream. Its sensor is very precise and its sound, although adjustable, is very loud, so we recommend locating it in a place free of drafts or where its sensor perfectly captures human presence.
