- Temperatura: 1800 K
- Tipo de casquillo: E27

Descripción del producto

Decorative LED filament bulb. This lamp has a very striking design ST94 type, amber colour is vintage being similar to the old incandescent bulbs. You can see inside the methacrylate tube how when it is illuminated with the LEDs, included in the socket, it produces a similar visual effect of filament. It is ideal to combine with different metallic table lamp holders that highlight all its beauty. Try it also using them as a set, hanging them from the ceiling with different textile cables and innovative sockets, as the cascade effect is in trend! And as it has no lampshade, this LED gives a lot of personality to any corner. It is perfect for places where sober colours such as black, grey or industrial style predominate. The outer glass of the bulb is carved on its base, giving the luminaire an elegant look, and it can be easily removed by unscrewing it. It has a power of 4W, a 230V power supply and emits a warm light thanks to its 1800 K and 200 lumens. E-27 socket.
