Precio: **36,95€**

Power ratings: incandescent and halogen lamps from 10 to 150W

Otras características

- Alimentación: 230 V
- Color: Gris
- Potencia: 150 W

Descripción del producto

Light intensity regulator. This practical device is designed to control dimmable lights, halogen and incandescent. (By means of a convenient push button). With box type design, made in grey colour. It is easy to install thanks to its reduced dimensions. It can also be installed inside a standard box connected to one or more pushbuttons for better precision. Compatible with LED lights, it recognises the type of load connected for correct regulation. Ideal for use in offices, shops, homes, etc. It is protected against overheating and controls even the lowest brightness thanks to its micro potentiometer. Incandescent and halogen lamps should be from 10 to 150 W, dimmable LEDs from 4 to 100W.
