

# DUAL RANGE AUTO RANGING MULTIMETER LCD DISPLAY

Prendeluz S.L.

Precio: **32,45€**

Intelligent extra-flat dual multimeter for automatic of AC voltage (RMS), DC voltage, resistance, continuity and frequency. It can also be a contact or non-contact AC voltage detector due to the sensor installed in the tip.

Otras características

## Descripción del producto

Intelligent extra-flat dual automatic range multimeter to detect AC voltage (RMS), DC voltage, continuity, resistance or frequency. Universal protection is required for the use of this multimeter to prevent electric shock. When measuring, do not touch the metal ends of the leads. Pay special attention when taking measurements above 60VDC or 30VAC (RMS) for possible shock. When the multimeter is switched on, it will automatically detect whether the measurement is VAC, VDC, resistance or continuity. Continuity Buzzer
