

DUCT TAPE 50 MM X 10M

Prendeluz S.L.

Precio: **3,95€**

Length 10 m and width 50 mm

Otras características

- Ancho: 50 mm
- Color: Negro
- Longitud: 10 metros

Descripción del producto

Multipurpose duct tape. It is a waterproof, resistant and super adherent tape, widely used in different situations for fixing, repairing, sealing or smoothing. The roll is 10 metres long, 50 mm wide, black in colour. It is recommended for use at a temperature of between -5?c to 70?c. It has a tensile strength of up to 20 kg and a pressure of up to 5 bars, thanks to its three integrated layers. Its durable and thick construction makes it ideal for minor repairs as well as other situations such as packaging, bundling and more, as its powerful adhesive sticks to a multitude of different surfaces and materials. It can be cut horizontally or vertically, customising its size for optimal and precise placement. It is compatible with dispensers in case you don't want to cut by hand or save time. Application on clean, dry surfaces is recommended for best performance.
