Descripción del producto

Articulated flexo lampholder, this luminaire from the antigona series is white. With its E-27 socket lamp holder, it is compatible with most light bulbs. It is flexible and consists of a round base (which can be replaced by the accessory included to fix it to the table) and a two-part metal structure with a metal cap and lampshade. Its net weight is 1100g. It is made of metal, giving it greater resistance. Its measurements are 34 to 67 cm high (depending on the joint) x 15 cm wide. Compatible with a power supply of 220 - 240 V. It includes cable with switch and plug for current, in black colour.
