- Color: Blanco
- Ip: 20
- Medidas: 83 x 83 x 40 mm

## Descripción del producto

Room temperature thermostat. This white regulator is perfect to regulate the heating and air conditioning, automatically in temperatures between 10°C to 30°C. Ideal for use in different places such as dining rooms, bedrooms, offices, schools, hostels, hotels, etc. Its sensor type is by means of a steam expansion capsule, with a thermal differential of 1°C. Very easy to install thanks to its 2 connection wires, its power supply is 240 V / 10 (2`5) A. Recommended for indoor use, it has an IP20 class I protection rating. Intuitive to use thanks to its wheel and its On/Off buttons on the side. Square in shape, it measures 83 x 83 x 40 mm and weighs 142 gr.
