Descripción del producto

Retro industrial style table lamp with a metal base and minimalist structure. The black colour of the base makes it shine even more. It makes the lamp more decorative and at the same time more durable. Choose this white lamp to decorate and illuminate your space with a cold or warm light bulb with a maximum wattage of 40 Watt. It uses E14 bulb sockets. It has a lampshade on the top made of fine fabric to avoid glare. It protects the eyes and allows a softer light to pass through. The combination of the elements of this industrial lamp is what makes it so special. Try it out in your living room or bedroom.? ?
