

INFRARED MOTION DETECTOR FOR WALL MOUNTING 12 M

Prendeluz S.L.

Precio: **11,95€**

Power supply 220-240 V~50 Hz

Otras características

- Alcance: 12 metros
- Alcance: 12 metros
- Alimentación: 230 V
- Color: Blanco
- Con infrarrojos: Sí
- Dimensiones: 55 x 80 x 68 mm
- Distancia: 1,8 a 2,5 metros
- Ip: 44
- Lúmenes: 2000 Lm
- Potencia: 800 W

Descripción del producto

Surface-mounted motion detector, for wall mounting. Perfect for use in transit areas such as entrances and exits, garages, porches, etc. Thanks to its infrared technology, it allows detection at a distance of 12 metres at an angle of 180 degrees. The switch-on time is adjustable (10 seconds to 15 minutes) as is the ambient light (from 3 to 2000 lux), both controllable with the buttons on the area behind the sensor. 230 V, it is recommended for use with LED lights as the maximum consumption will be 400W, while with fluorescent lights it will be 1200W. The optimum operating temperature is between -20°C+40°C and the installation height is between 0.5 to 3.5m. For correct installation, it has 3 cables. Its protection index is IP65, making this infrared presence sensor the best for outdoors.
