Descripción del producto

Violet lamp holder, with E27 socket. It is ideal for installation on the ceiling or walls of the house. It comes in a purple tone that stands out due to the silicone material and gives the product a sharpness. It works very well for spaces where you want to show an original and striking design. Its E-27 socket makes it compatible with most light bulbs, we recommend using flashy LEDs (not included). Play with the different styles you can create in your home or bedroom. Available in a variety of colours as required: blue, green, white, black or purple. It has an adjustable length of 1 metre.
