

LED BULB E-27 WITH TWILIGHT SENSOR 4000 K

Prendeluz S.L.

Precio: **10,95€**

Power supply 220-240 V~50 Hz

Otras características

- Alcance: 12 metros
- Alimentación: 230 V
- Color: Blanco
- Con infrarrojos: Sí
- Dimensiones: 85 x 60 x 90 mm
- Distancia: 0'5 a 3'5 metros
- Ip: 44
- Potencia: 1200 W

Descripción del producto

Adjustable head detector. Consists of a square base that is screwed on and the circular infrared detector, which allows the detection area to be more precise. Adjustable in metres, lux (from 3 to 2000 lux) time and light sensitivity (adjustable from 3 to 2000 lux). When used with energy-saving LED lights it has a power consumption of 300 W, in incandescent lamps up to 1200 W. Dimensions 85 x 60 x 90 mm. Its 180° infrared detection technology allows a sensitivity of up to 12 metres. Installation is recommended between 0.5 and 3.5 metres. The input voltage is 220-240 V~50 Hz. It has IP44 protection, making it perfect for outdoor areas such as exits and entrances. Thanks to its 3 connection cables it is very easy to install.
