Descripción del producto

V-16 car beacon. This emergency light complies with the requirements of the new DGT regulations, being approved to replace the safety triangles in accidents. With 2 modes of use, it will provide light and safety wherever you are and whatever the weather. This LED emergency light is ideal for when you find yourself in the middle of a difficult situation on the road. Necessary for any emergency situation! It has two lighting modes, on the one hand the orange flashing emergency light (SOS) and on the other hand a steady white light. The light is powered by a 9V battery (6LR61 not included), with an autonomy of 4 hours. The LED model is IDIADA-PC20070125. Its operation is very easy, under its black magnetic base you have the button to switch from one mode to another. Thanks to its base and its ip44 protection you can easily leave it on the roof of your car even if it rains. Made of black plastic, methacrylate and rubber details.
