

# LED DICHROIC LAMP MR16 4000K

Prendeluz S.L.

Precio: **13,87€**

Power supply 220-240 V-50 hz. protection rating IP20

## Otras características

- Alimentación: 220 - 240 V
- Tipo de casquillo: E27

## Descripción del producto

Lampholder with infrared sensor. This E-27 type lamp holder can be fitted to any standard bulb, it can be used with filament, LED and low consumption bulbs (which saves up to 80% energy). Its 360° infrared movement sensor detects movement at a maximum distance of 6 metres. In white colour, it measures 60 x 115 mm. Ideal for connecting your bulbs in transit areas such as entrances and exits. It includes two buttons, one to regulate the switch-on time (from 10 seconds to 5 minutes) and the other to regulate the ambient light from 3 to 2000 Lux (to regulate it is advisable that there is no movement in the area). They have a maximum power of 60 W and a 240 volt connection. The recommended installation height is 2 to 3.5 metres. It has an IP20 protection rating, so it is recommended for indoor use.
