Descripción del producto

T-shaped spotlight connector, this is a black accessory. Used to create a bifurcation of the spotlight rail to the left between three-phase rails (3 lights). Allows two track sections to be connected by extending the straight track and branching with another track section to the left at a 90 degree angle, connector t left b. Valid for three-phase 4-way LED track, as it incorporates four electrical conductors that can power the 3 independent ignition circuits that the three-phase track has. Made of PC, a high quality and resistant material. It measures 165 mm long x 98 mm high. Available in white colour.
