Descripción del producto

LED tube with infrared presence detector. It is an innovative type of lighting. When it detects any type of movement, it lights up at maximum power, 9W. When it detects the absence of movement it reduces its intensity to 3W. It has a colour temperature of 6500K, so it emits a cold white light. Its luminous flux is 800 Lm and its socket is G13. This led tube, of type T8, when working "pir" has up to 80% of energy saving, saving twice as much! It also has a useful life of 50,000 hours, has a colour rendering index >80. Its dimensions are 600 m x 26mm.
