Descripción del producto

Wall light with adjustable movement sensor. Curved rectangular LED wall light with adjustable light (from 3 to 2000 LUX) and IR motion sensor, with adjustable time (10 seconds to 5 minutes). Perfect for entrances and porches! Black in colour, it has dimensions of 65 x 280 x 60 mm. This elegant wall light has a detection distance of 9 metres at 140 degrees, it also illuminates at the same angle. It is therefore recommended for installation at a height of approximately 1.80 to 2.50 metres. Its colour temperature is 4000K and it has 1200 Lumens, providing a bright and modern light on the walls of houses, garden houses or garages. The input voltage is 220-240 V - 50Hz, power of 15W. Having a protection rating of IP54 it is recommended for both outdoor and indoor use. It has a useful life of 15000 hours, many years of operation, as its LED is not interchangeable. It is recommended for use in temperatures between -20 and 40 degrees. The anthracite plastic housing gives this wall light a very modern design.
