

# MINI INFRARED MOTION DETECTOR

Prendeluz S.L.

Precio: **11,45€**

Working temperature -20? to +40?c

## Otras características

- Alimentación: 240 V
- Color: Blanco
- Con infrarrojos: Sí
- Distancia: 6 metros
- Empotrable: Sí
- Ip: 65
- Medidas: 56 x 34 x 24 mm
- Potencia: 800 W
- Potencia: 800 W

## Descripción del producto

Recessed motion detector, for installation in false ceilings. It is also ideal for other conditioned surfaces or in luminaires (mirrors, wall lights, etc). The installation height should be between 1.8 and 2.5 metres. With infrared presence detection technology, it has a detection angle of 360? and reaches a distance of 6 metres. The ambient light sensitivity is adjustable from 10 to 2000 lux and the switch-on time is also adjustable, from 5 seconds, 30 seconds, 1, 3, 5 and 8 minutes. Its standby consumption is 0.1W and during switch-on 0.45W. The maximum power it achieves with LED energy saving bulbs is 200W, while with incandescent bulbs it is 800W. The input voltage is 200-240 V~50-60 Hz. Easy to install, it contains 3 conductor wires for better connection. It has an IP65 protection rating and is recommended for operation in temperatures from -20? to +40?c. Its small size (56 x 34 x 24 mm) makes it perfect for discreet placement in different points of a room such as mirrors or small luminaires.
