Prendeluz S.L.

Precio: **5,95€**

Works with most standard and high definition devices with Toslink ports

## Otras características

- Color: Negro
- Longitud del cable: 3 metros

## Descripción del producto

The digital optical audio cable is a fibre optic cable that uses intermittent pulses of light to transmit a digitally encoded audio signal. The cable's multi-channel connection will send a DTS or Dolby Digital soundtrack to an audio processor or audio/video receiver so you can enjoy a stunning surround sound experience. This Toslink fibre optic cable works with most devices that have Toslink ports. It allows you to connect a multitude of electrical devices with digital outputs such as: video game consoles (Ps2, PS3, Xbox, Xbox 360...) DVD players, stereos, home theatre systems, LCD flat screen TVs, satellite or cable TV systems, etc.... Use the cable to connect a CD or Blu-Ray player, game console or other audio component to an audio system, preamplifier or home cinema. You will enjoy the best sound quality! Immerse yourself in your favourite movies, listen to your character's footsteps on your console or experience the music of the moment! Made with a tough black PVC outer layer, the cable is corrosion resistant and has a shock absorbing tube for added protection. Its gold-plated connectors allow for distortion-free playback of fibre-optic digital audio. The sound quality is reliable, because compared to other electrical cables, the signal is purer and therefore the transmission is interference-free and even more genuine than the original recorded sound. The connectors offer comfortable grips for easy, flexible and lightweight handling, and their tips include a rubber protection for when it is not connected. Easy and simple to use: just connect each end to the corresponding port of the compatible device and you are ready to go! Maximum audio quality can only be achieved with this 3 metre fibre optic cable. If you like to enjoy the highest quality and maximum detail in sound... this is the product for you. Available in a variety of sizes.
