- Lúmenes: 150 Lm
- Potencia: 6500 W

Descripción del producto

Solar wall light that works without the need for wiring. This solar wall light works perfectly under the IP65 protection index that allows it to resist wind and rain. The wall light with solar sensors charges during the day by the sun's rays, which means great energy savings. It has 3 light modes as required: 1) dim light all night long. 2) infrared indication light. 3) constant light induction light. We encourage you to install it in patios or gardens.
