- Color de luz: Azul
- Intensidad: 85 dB
- Medidas: 17.81 x 7.01 x 23.39 cm
- Peso: 220 gm
- Pilas: LR06/AA

Descripción del producto

Wireless presence announcer, its sensor with infrared technology detects presence reliably, it will alert you to visitors with its lights and powerful sound! The receiver communicates with the transmitter via radio frequency and can be up to 60 metres away from each other. So it is suitable for large distances within your home. The infrared PIR sensor recognises movement at a distance of 4 metres. The transmitter indicates presence with a high intensity sound of 85 dB and both devices are illuminated in blue. The sound is selectable from 8 different types. White in colour and square in shape, they weigh about 220gm and measure approximately 17.81 x 7.01 x 23.39 cm. They are wireless, as the devices are powered by 3 LR06/AA batteries (not included). It has a low power consumption, a working current of 175 mA and 0.28 mA in StandBy, so the batteries will last a long time without running out.
