Otras características

Descripción del producto

Socket base with consumption meter. The LCD display shows overload warnings when the current exceeds 3680W. When exceeding the overload icon flashes on the display to warn the user to unplug it to ensure safety in the home. It features a multi-function socket with power, energy, voltage, amperage, power factor, and cost control ideal for monitoring the energy consumption of electrical appliances. You can use real-time monitoring to see the power consumption. It also includes data retention function to memorize data.
