## Descripción del producto

Professional LED spotlight, suitable for outdoor use thanks to its IP66 protection rating. High resistance to water and dust. It has a power of 200 W and a connection of 85 - 265 AC current. Made in a square shape, in white aluminium, its dimensions are 325 mm long x 400 mm high x 95 mm wide. Its luminous flux of 20000 Lm and its colour temperature of 6500 K allow it to illuminate with a cold white light at a beam angle of 120°. Its LED will allow you to save thanks to its consumption and duration, as it has a useful life of 50,000 hours. It has a power factor of 0.95 and a colour rendering index (CRI) >70. Perfect for garages, porches or places in the garden or terrace where you need a powerful light. Its installation is simple, it includes a metal bar that supports the spotlight and allows you to move it up and down.
