- Empotrable: Si
- Material: Aluminio
- Peso: 400 gr
- Pilas: 4 D

Descripción del producto

Repels moles. Disperses burrowing animals over an area of action of 1500 m?. This practical device emits a vibration in the subsoil at regular intervals that scares the animals away from their burrows. It has a compact design in a body made of aluminium, with dimensions of 400 x 42 mm and a weight of 400 grams. It is effective against moles, shrews, ground squirrels, field mice and burrowing rodents in general. It is powered by 4 D batteries (1.5V batteries) not included.
