Descripción del producto

Bird and bird repeller. This horn to install on a wall or surface, has a connection equipped with a PIR infrared motion detection system. Its infrared coverage is 130° degrees and has a range of 9 metres, which configures an area of action of 4,000 m² at maximum volume (20 db). Its power is 6W and it has a 230 V power supply. This black scarecrow speaker emits different sounds that imitate predatory birds, making it very useful for scaring off vermin. Keep your garden safe! Effective and automatic.
