Descripción del producto

LED strip with colour change to the rhythm of the music, with remote control and 8 colours, light to the rhythm of the music! Equipped with 90 high quality LED lights, the chips emit light evenly, reproducing colours in a natural way. The pure copper circuit board gives the LEDs a high stability, extending their lifetime up to 20,000 hours. This strip has a length of 3 metres, very flexible. It can also be cut (following the cutting arrow) without causing any damage. Very easy to mount, the back of the LED strip has a self-adhesive backing to stick it to any kind of surface. It has IP65 protection against water and dust, so it is highly recommended for outdoor use. Light up your garden or terrace! The synchronised LED strip is available in 8 static colours, 4 dynamic modes and 4 music modes. The lights will change colours with the rhythms of the music or your microphone. Ideal for creating a festive atmosphere. It has a power of 24W and a voltage of DC 12V. 120° beam and 50/60Hz frequency.
