Descripción del producto

Spherical LED smart lamp, with smart technology connected to wifi, the SMART LIFE application allows you to manage it on your device, change the intensity and temperature of the light according to the moment from 1% to 100% according to your needs! It regulates the different colour tones, going from intense reds to light blues as it provides 16 million colours to instantly change the look and atmosphere of your room. This lamp works with any WiFi router, keep the smart light connected to your home's 2.4Ghz wifi network (5Ghz not compatible with mains) so you can always use it. You can control this smart bulb remotely on your smartphone thanks to the APP even when you are away from home. The app allows you to easily and intuitively select from a wide range. It is also voice-controlled thanks to the integration with Amazon Alexa or Google Home. This includes controls such as switching on/off or dimming/brightening your lights. For example, you can say, "Alexa, change the smart bulbs to yellow. Group control functions allow you to control more than one smart bulb at the same time with commands. It has a lifetime of 25000 hours and a luminous intensity of 400 lm. The socket is standard E-27, so you can use it in a multitude of places. Its power is 5.5W and its voltage is 220 - 240V AC.
