Descripción del producto

American plug to European socket. This adaptor consists of an American B type female base, with three triangle shaped pin sockets. It has 3 pins positioned in a triangle shape. 2 flat pins and the third one a little wider, this NEMA 5-15 / NEMA 5-20 type plug is compatible for appliances with American Japanese type plug (JIS C 8303). The output of the plug is type C. It supports 15 A / 20 A power supply. This plug is ideal for when travelling or for converting your devices bought abroad to European power supply. It measures 65 x 50 mm and is black in colour. It is small, practical and adaptable. We recommend it to take it with you on your travels so that you can always be connected to the mains. It is valid for USA, Canada, Dominican Republic and Mexico. North America, part of South and Central America, the Caribbean and also most of Asia.
