Otras características

Descripción del producto

The bi-directional HDMI adapter is ideal for supporting 4k@30Hz and 3D resolutions. Being bi-directional it allows you to connect 2 HDMI inputs to the same display or an HDMI source to switch from one display to another although you cannot display 2 displays at the same time. It has a stable connection with no data loss. It transmits audio and video. It has a very light and elegant design so it will go almost unnoticed at home, taking up little space.?
