## Descripción del producto

Decorative lamp post for outdoor and indoor use, it is powered by solar light or recharged by an LED. This lantern gives a very elegant touch to rooms and exteriors, as it imitates a candelabra with a fire effect. The panel is powered by a Li-Ion 1865/3.7V/1200mAh battery. USB charging time: 2 hours. Solar charging time: 12 hours. Operation A lasts 3 nights, operation B lasts 4 hours. Dimensions: Lantern: 114x125mm / Stake height 382-571mm. Power 2W, colour temperature 1500 K. The operating mode of the LED stake is as follows: A) It turns on automatically at dusk (150lux). This method applies only outdoors. B) Automatically switches on at dusk (400lux). In contrast to A, this method is applicable for indoor and outdoor use. 360° opening.
