Prendeluz S.L.

Precio: **29,45€**

Dimensions 85 x 85 mm

Otras características

- Alimentación: 230 V
- Color: Blanco
- Empotrable: Sí
- Medidas: 85 x 85 mm
- Potencia: 600 W

Descripción del producto

Light intensity regulator, compatible with incandescent lights below 600W. This rotary dimmer switch is made of high-quality, wear-resistant plastic and is safe and durable. Consisting of a two-piece faceplate; base with rotary knob (6 mm rotating shaft) fixing screws. The rotary knob is large, easy to grip. Turn it freely to switch on/off or dim the lights to the desired level! Must be combined with a dimming power supply and dimmable bulb. Suitable for switch circuits, transposable between end phase and start phase. Soft start light, minimum to maximum brightness time is approx. 3 seconds. Flickering of connected lamps due to undershoot of the specified minimum load (if flickering occurs, you can adjust it by rotating the rear screw marked with a cross) or centralised pulses from power stations does not affect the device. Suitable for modernisation as well as for new installations. Active two-wire connection, input voltage: 230 V, power frequency: 50Hz-60Hz, maximum load power: 600W. White colour, dimensions 85 x 85 mm.
