## Descripción del producto

Single-pole, white, pear-shaped push button. This switch is ideal for turning lights on and off from the place where you are. This push button, popularly called "pear-shaped" because of its shape, is made of white thermoplastic. It is used to operate a doorbell or lights and is easily installed at the end of the cable (by means of screws and thread). It has a voltage of 250 V and 2A. Its dimensions are 56 mm long by a diameter of 27 mm.
